The WEPA Prestige dispenser range sets itself apart because of its modern and uniform design.

- All the dispensers are lockable and have a uniform locking system.
- All the dispensers are delivered with mounting plates. This simplifies the mounting on the wall and the exchange of the dispenser.

The content level is always visible through the viewing window. Because of simple and functional technology, our dispensers are easy to operate, maintenance-free and reliable.

WEPA Professional with the trade-mark „Clou“ is a competent partner to find solutions concerning

Hygiene - Paper - Products

Our products are used within the industries, hotels, hospitals, old age homes and public institutions.

As the largest family owned company in the European tissue industry, with a low hierarchy, commitment, competence and decisions, we are characterised by high flexibility, reliability and competence.

Our trade direction and the relationship to our clients are highly appreciated by our business partners for years.

Due to a clear product partition according to CLOU Prestige, CLOU Comfort and CLOU Smart, the brand

„CLOU“

offers all over Europe a high profile range of high quality products for various needs.

The Product portfolio of WEPA Professional consists of a perfect combination of high quality hygienic products and user – friendly dispensers for various applications.

With 1400 employees and more than 460 Mio. € turnover, the WEPA group is fully committed to the European tissue market. Approx. 350,000 tonnes high quality hygienic paper are produced in 6 factories with manufacturing bases in Germany, Spain and Poland. Through the utilisation of PIQS (Productions-Integrated Quality System) the specifications are constantly checked. Our products adhere to the ISO standards.

WEPA Professional is the business section for the Away-From-Home market.

The products of the Wepa Professional range are predominantly produced in the manufacturing base in Arnsberg-Müschede and Piechowice. The manufacturing base Piechowice with its location in Poland produces only 1-layer products. The production line at Arnsberg-Müschede is the Competence-Center for multiple layer tissue-products.

Due to constant investments in the converting process the Professional range with the trade - mark CLOU is subjected to continuous enhancement.

Through our modern high rack warehouse, with a capacity for 34,000 pallets, we are able to deliver after orders received within 48 hours.

The product „CLOU“ a product with clue.
